INTRODUCTION

The contents of the ESRI - Department of Finance databank of annual economic time series for Ireland is published in this document. The databank has grown up over fifteen years to meet the needs of macro-model building in the ESRI and the Department of Finance. In the late 1970s and the early 1980s the Central Bank also had a major involvement in its development.

The contents of the databank show many signs of its history. Variables appear under the guise of a number of different mnemonics reflecting the evolving nomenclature used in the different models in the ESRI and the Department. Many variables, which are no longer used in the ESRI's Medium-Term model, are still maintained in the databank in case they may prove useful in future research.

The basis of the databank is the National Accounts for Ireland published by the CSO - in this case in National Income and Expenditure, 1993 (NIE93). The contents of tables 1 to 25 of that publication are contained in the databank. These series all begin with the letter B followed by four digits; the first two digits describe the table number in NIE93 and the last two digits describe the position of the series within the table reading from the top. However, due to the disappearance of series which earlier editions of NIE contained, the numbering may not be identical to that in NIE93.

The databank provides comprehensive coverage for Ireland of the National Accounts. There is also extensive coverage of government expenditure and revenue on a national accounting basis. Employment data at a limited level of disaggregation is available. The data on industrial output, employment and earnings is available at a disaggregated level using data from the Census of Industrial Production CIP. The data on energy use is available in much greater detail than data on energy prices. Detailed information on numbers in receipt of unemployment benefit assistance and rates of benefit is also included.

The national accounts series have been assembled from thirty five years of the National Accounts publication. In so far as possible consistent series have been obtained from the CSO. Where this was not possible series have been linked using the earliest year available in the latest publication. The government series for years before 1974 have been adjusted in a simple manner to convert them to a calendar year basis.

Discontinuities in data published by the CSO were significant for 1969-70 and 1974-5. However, other adjustments, such as revisions to the balance of payments, may also pose

problems. Where problems have been identified the series have been linked to try and overcome the discontinuity.

In addition to NIE93 other major sources used are additional National Accounts data at a more disaggregated level than published, supplied by the CSO; the Labour Force Survey and the earlier publication Trends in Employment and Unemployment; energy balance sheet data from the Department of Energy and the IEA - OECD; the Census of Industrial Production (CIP); the Finance Accounts and the Reports of the Revenue Commissioners.

Further details of the sources and processing of the data are given in ESRI Technical Series papers 1, 3, and 5.

In recent years the work on maintaining the databank has been undertaken by Mary Flanagan, Feargal O'Brolcháin and Tom Monks of the Department of Finance and John Fitz Gerald in the ESRI. Any queries should be addressed to Feargal O'Brolcháin of the Department of Finance (353-1-6767571) or John Fitz Gerald of the ESRI (353-1-6671525).

While considerable effort has gone into checking the contents of this document the authors can not guarantee the accuracy of all the data. Users are advised to check the series before using them for research. Any problems should be notified to the authors for subsequent action. The data are also available on disk in a format suitable for reading into the TSP econometrics package. **The data are supplied on the basis that they will be used for non-commercial purposes, i.e. for teaching or research.**

A crude guide to the mnemonics used is given here. The mnemonics are constructed using a series of prefixes and suffixes as well as a set of mnemonics for individual sectors, all of which are given below:

Prefixes

National Accounts	B
Balance of Payments	BP
Consumption	C
Central Bank Assets and liabilities	CB
Consumption, disaggregated on the old classification	CONB
National Accounts - EC basis	C0
Energy	E
Final Demand	FD
Flow of Funds	FF
Government sector	G

Government borrowing	GB
Government current expenditure	GC
Government current expenditure on goods and services	GCG
Government current expenditure - subsidies	GCS
Government current expenditure - transfers	GCT
GDP	GDP
Government capital expenditure	GK
Government capital expenditure - Investment	GKI
Government capital expenditure - Transfers	GKT
National Debt	GN
GNP	GNP
Government capital revenue	GR
Government current revenue	GT
Indirect Taxation	GTE
Excise taxes	GTEX
Direct taxation	GTY
Investment	I
Capital stock	K
Employment	L
Imports	M
Population and demographic variables as well as some financial	N
Value added	O
Productivity	OPR
Prices. This prefix appears before the prefix describing the sector or type of good. e.g. PC is the price deflator for personal consumption	P
Output	Q
Energy inputs	QE
Output - Gross	QG
Material inputs	QM
Output - net	QN
Rate - rate of tax or rate of benefit, interest rates and reserves	R
Exchange rate and rate of excise duty	REX
Rate of unemployment assistance or benefit	RU
Stocks	ST
Numbers unemployed	U
Unit labour costs	UCL
Average earnings - wage rates	W also AAE

Exports	X
Income	Y
Profits	YC
Factor income	YF
Personal Income	YP
Wage bill - total earnings	YW

Sectors

Agriculture	A
Building	B
Government	G
Housing	H
Industry	I
Industry - building	IB
Industry - traditional manufacturing	IMD
Industry - food processing	IMF
Industry - high technology	IMH
Industry - manufacturing	IM
Industry - utilities	IU
Services	S
Services - market	SM
Services - market - Distribution	SMDI
Services - market - other including Professional and Financial	SMPF
Services - market - Transport and communications	SMTC
Services - non market	SN
Services - non market - Health and Education	SNHE
Services - non market - Public Administration	SNP

Suffixes

Change	DL
Percentage change	_DOT
Germany	GER
Tonnes	_T
UK	UK
USA	USA
Value (as opposed to constant prices)	V

Machine Readable Data

The data are available on a single disk in a format suitable for reading into TSP. To unpack the data on the disk copy the contents to a directory on your hard drive. Make that directory your current directory and then type ESRI. The file DATABASE will contain all the data in the databank.

GCTNDRI - DATE REVISED: 10/11/94
ANNUAL DATA FROM 1958 TO 1993

THIS IS THE CHANGE IN THE INTEREST RATE ON NATIONAL LOANS IN THE RELEVANT YEAR AS A RESULT OF REPAYMENTS OF NATIONAL LOANS. UP TO 1974 IT HAS BEEN ADJUSTED TO A CALENDAR YEAR BASIS.

SOURCE: FINANCE ACCOUNTS 'STATEMENT OF NATIONAL DEBT CHARGED DIRECTLY ON THE CENTRAL FUND', BY MULTIPLYING THE AMOUNT OF THE NATIONAL LOAN REDEEMED BY THE INTEREST RATE FOR THAT LOAN. (A MORE ACCURATE FIGURE CAN BE OBTAINED BY USING THE DEBT MODEL REFERRED TO IN FITZGERALD, 1986).

1988 FROM THE NET DECREASE (MULTIPLIED BY INTEREST RATE) FOR EACH INDIVIDUAL LOAN.

FROM 1987 IN THE 'NATIONAL DEBT STATEMENT' TOTAL INTEREST PAID IN THE YEAR ON VARIABLE RATE STOCK IS INCLUDED. ('SERVICE OF NATIONAL DEBT' AND 'CAPITAL SERVICES REDEMPTION A/C')

GTYDIRT - DATE REVISED: 10/11/94
ANNUAL DATA FROM 1960 TO 1994

DIRT TAX-YIELD NET OF REFUNDS. DIRT TAX IS SPLIT INTO 2 ELEMENTS
GTYDIRT AND GTYDIRTC. THE LATTER IS CORPORATE DIRT TAX. IN THE
NATIONAL A/C'S BOTH ARE INCLUDED IN TAXES ON PERSONAL INCOME AND
WEALTH. GTYPER NETS OUT ALL DIRT TAXES WITH GTYDIRT REMAINING A
SEPARATE CATEGORY AND GTYDIRTC BEING ADDED TO CORPORATION TAX
AND SOME OTHER ITEMS TO GIVE TOTAL COMPANY TAXES, GTYCTOT.
